

# The Maths Solution

---

After fifteen years of excellent English tuition, Morris Allen Study Centre now brings the same high standard of Maths instruction through Maths Solution.

We have developed a unique Maths course that adheres closely to the Singapore curriculum, yet is delivered in a manner that sparks interest in the subject. All our teaching staff are specially selected for their teaching abilities, experience and child-centred approach to teaching Maths. We believe that our students should be positively challenged and interactively stimulated to excel in Maths.
